TOOL CARE CALIBRATION

Wear and tear, process changes as well as tool environment can affect the clamping force in your joints
Calibration is key to...

Tools calibration

Achieve high quality

- Same certificates worldwide
- Traceability to national standards
- On-demand customization
- Certificates available 24/7 for up to 10 years
- Done on-site or at Desoutter
- Reminder of next calibration

WHY CHOOSE DESOUTTER?

- Our laboratories are ILAC* recognised
- Our technicians are skilled and regularly trained
- They have the right tooling, error proof process and software
- Your certificates are available 24/7 from any device
- We remind you on the calibration due date

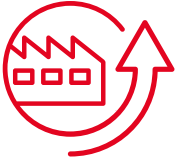

Accredited calibration

Safety & traceability of your tightening process

- Wide torque range: from 0.05Nm to 2000Nm
- Adjustment of the equipment
- Certificates available 24/7 for up to 10 years
- Reminder of next calibration

* ILAC (International Laboratory Accreditation Cooperation): an agreement signed by almost all industrialized countries. Certificates from accredited laboratories of the member states are recognized by other ILAC member countries.

Boost your Productivity with High Quality

Get a Safe and Traceable Tightening Process

Benefits

- Less rework
- Reduced risk of false OK results
- Fulfilment of ISO requirements
- Providing proof in case of liability issues

GET EVEN MORE FROM DESOUTTER SERVICE

INSTALLATION AND SETUP

SMART START

Start-up

Quality Assurance equipment like Delta Cart and WLAN Delta Wrench requires solid setup to meet your needs in terms of traceability and error proofing.

ON-DEMAND SERVICES

PRODUCTION BOOST

Performance Validation

Detects potential false OK results and get recommendations to improve the tightening process.

TMSS

Track My Service Status

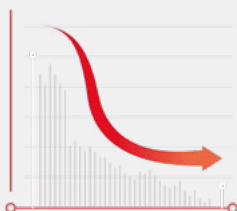

Check your calibration status online, download your certificates and get important service data about your tools maintenance.

MAINTENANCE OF YOUR TOOLS

TOOL CARE

A range of gradual service plans to improve your uptime with less breakdowns and increased lifetime.

LESS BREAKDOWNS

TOOL LIFE IS EXTENDED

Basic Care

Preventive maintenance and calibration.

Smart Care

Basic Care plus optimised maintenance and repairs.
